Multiplication (*) IN SQL

Step 1: Create the Table

CREATE TABLE OrderItems (

    ItemID INT,

    Quantity INT,

    PricePerUnit DECIMAL(10, 2)

);

Step 2: Insert Data into the Table

INSERT INTO OrderItems (ItemID, Quantity, PricePerUnit) VALUES

(1, 2, 15.50),

(2, 5, 7.80),

(3, 3, 10.00);

Step 3: Perform Multiplication to Calculate Total Cost

SELECT ItemID, Quantity, PricePerUnit, (Quantity * PricePerUnit) AS TotalCost

FROM OrderItems;

Step-4 show

Step 5: Use Multiplication in More Complex Queries (Optional)

SELECT SUM(Quantity * PricePerUnit) AS TotalOrderCost

FROM OrderItems;
